Food, Fertilizer, and Foreign Policy: The New Geopolitics of Agri-Food

Moor Room

Food security is a major global policy challenge and a priority across Asia that economies and organizations address in relation to local contexts and capabilities. It is simultaneously an issue of domestic concern and geopolitical imperative. How are governments and organizations in Asia and Canada navigating this terrain? And how can Canadian agriculture, agri-food, fertilizer and agri-technologies contribute to food security – and foreign policy – priorities in Asia?

- **Diedrah Kelly**, Executive Director, Canada's Indo-Pacific Agriculture and Agri-Food Office (Philippines) (moderator)
- **Claire Citeau**, Senior Vice President, Canadian Meat Council (Canada)
- **Kim Thanh Nguyen**, General Director, Saky Foods (Vietnam)
- **Chris Lane**, President & CEO, Saskatchewan Trade & Export Partnership (STEP) (Canada)

The AI-Compute Conundrum: Powering the AI Revolution

Morrison Room

As use of artificial intelligence accelerates globally, the race to build digital infrastructure—especially data centres and compute power—is intensifying. But the energy demands of large-scale AI training and deployment are creating new

Strategic Investment Partnerships in the Agri-Food Sector

Moor Room

This session focuses on deepening investment ecosystem connections between Canada-based and Asia-based companies, governments, service providers and innovation hubs to catalyze and grow transpacific agri-food cooperation. What are some recent examples of successful agreements in the Canada-Asia agri-food space? How are these advancing food security? What factors act as roadblocks to deal making? And what are some novel pathways to cooperation?

- **Joseph Fung**, Managing Partner, Saltagen Ventures (Hong Kong) (moderator)
- **Scott Moore**, Executive Vice President and Chief Financial Officer, Export Development Canada (EDC) (Canada)
- **Tyler Groenveld**, CEO, Protein Industries Canada (Canada)
- **Xuiling Guo**, CEO, Nurasa (Singapore)

Critical Minerals and Materials and Strategic Dependencies: Clean Tech Supply Chains

Morrison Room

The growth and deployment of clean technologies at scale relies on stable and accessible supplies of critical minerals, including copper, nickel, lithium, cobalt, graphite, rare earths, and other critical materials. Canada possesses important deposits of these and other critical minerals, and has notable strengths in the mining and processing segments of several critical minerals supply chains. How can Canada become a more significant and dependable partner of choice for Asia in critical minerals supply chains?

- **Allen Chan**, Director of Energy Transition Consulting, S&P Global (Singapore) (moderator)

Global Investment to Meet Asia’s Energy Future: Mapping Demand and Opportunity

Morrison Room

This session explores the scale, diversity, and strategic direction of energy investment to supply markets across Asia—home to the world’s fastest-growing energy demand. As countries across the Indo-Pacific pursue parallel goals of economic development, energy security, and decarbonization, the need for capital investment in energy infrastructure has never been more urgent—or more complex. The panel provides a region-wide scan of energy demand, which technologies and fuels are gaining traction, and where Canada fits into the Indo-Pacific energy landscape, including LNG and nuclear technologies.

- **Sara Wilshaw**, Senior Assistant Deputy Minister, International Trade and Chief Trade Commissioner, Global Affairs Canada (Canada) (moderator)
